Course Objectives

Principles and Practice of Intraoperative Neuromonitoring is designed for advanced professionals who perform or support intraoperative neuromonitoring (IONM) procedures. This includes but is not limited to:

- Neurologists
- Surgical Neurophysiologists
- PM&R physicians
- Neurological Surgeons
- Anesthesiologists
- Orthopedic Surgeons
- Board Certified Neurophysiologists
- Vascular Surgeons
- Senior Neurophysiology Technologists
- ENT Surgeons

The course will highlight practice specifications, multimodality protocols, recent advances in the field, pre-/post-operative neurological evaluation and management, and telemedicine. Presentations will make reference to current literature, technical developments, methodologies and clinical efficacy. The faculty includes University of Pittsburgh Medical Center physicians and neurophysiologists with extensive clinical and academic expertise in IONM. The course is designed to expose the participants to material that will allow them to acquire a comprehensive understanding of IONM and how it relates to a wide variety of relevant topics such as:

- Advanced principles for neurophysiological monitoring, including instrumentation, neuromonitoring protocols, alarm criteria and clinical efficacy
- Minimally invasive spine surgery, including transpsoas approaches
- Pre-, peri- and post-operative evaluation of neurological complications including stroke, cognitive deficits, seizure and spinal cord injury
- Multimodality monitoring techniques for a broad array of procedures including spine and vascular
- Innovations in telemedicine
- Microelectrode recording during Deep Brain Stimulation (DBS)
- Cranial nerve monitoring during skull base procedures
- Neuroanesthesia
- Interpretation and communication with surgical team
- Development of a Policy & Procedure manual; documentation and communication with the technologist; development of quality assurance metrics; and staff training
- Problem based learning with real-time data analysis and formulation of differential diagnoses

Hands-on Workshops

What sets this course apart from any other is the inclusion of a 4 hour hands-on workshop where all attendees will have the opportunity to put what they have learned from lectures into practice. During this workshop, participants will receive instruction and guidance while placing electrodes for cranial nerve EMG monitoring on cadavers (including the extra-ocular muscles). Participants will also learn to place upper and lower extremity EMG electrodes accurately on anatomical models, build multimodality tests with IONM equipment, and use transcranial Doppler to insonate cerebral vessels. There will also be ample opportunity for interaction between the faculty and the audience. All of this comes at no additional cost for all course participants.

Due to the time constraints associated with such a workshop, space will be very limited for this course. Be sure to reserve your spot early so you don’t miss this chance to gain a truly unique education in Neuromonitoring!

Course Directors

Jeffrey R. Balzer, Ph.D., FASNM, DABNM
Associate Professor of Neurological Surgery, Neuroscience and Acute and Tertiary Care Nursing
Director, Clinical Operations, Center for Clinical Neurophysiology
Director, Cerebral Blood Flow Laboratory University of Pittsburgh Medical Center

Partha Thirumala, M.D., FACNS, FAAN
Associate Professor of Neurological Surgery and Neurology
Medical Director, Center for Clinical Neurophysiology University of Pittsburgh Medical Center

Course Coordinator

R. Joshua Sunderlin, M.S., CNIM
Education Specialist – Procirca Center for Clinical Neurophysiology

Faculty

Katherine Anetakis, M.D.
University of Pittsburgh Department of Neurological Surgery

Maria Baldwin, M.D.
University of Pittsburgh Department of Neurology

Jeffrey Balzer, Ph.D.
University of Pittsburgh Department of Neurological Surgery

Mindy Corridoni, B.S., CNIM
Procirca Center for Clinical Neurophysiology

Donald Crammond, Ph.D.
University of Pittsburgh Department of Neurological Surgery

Johnathan Engh, M.D.
University of Pittsburgh Department of Neurological Surgery

Brian Gierl, M.D.
University of Pittsburgh Department of Anesthesiology

Aatif M. Husain M.D.
Duke University Department of Neurology

Ashu Jadhav, M.D., Ph.D.
University of Pittsburgh Department of Neurology

Andrew Moyer, B.S., CNIM
Procirca Center for Clinical Neurophysiology

Ryan Quallich, B.S., CNIM
Procirca Center for Clinical Neurophysiology

Raymond Sekula, M.D.
University of Pittsburgh Department of Neurological Surgery

R. Joshua Sunderlin, M.S., CNIM
Procirca Center for Clinical Neurophysiology

Partha Thirumala, M.D.
University of Pittsburgh Department of Neurological Surgery
### Day 1

Sponsored by Procirca and University of Pittsburgh School of Medicine Center for Continuing Education in the Health Sciences

**Tuition**
$650 for physicians and other attendees seeking CME credits
$500 for all other healthcare professionals seeking CEU credits

tuomey.com/intraoperative-neuromonitoring/Pages/neuromonitoring-workshop.aspx

**Registration and Online Payment**
On-line registration can be completed by visiting the Procirca website, procirca.com.

**CME Accreditation and Designation**
The University of Pittsburgh School of Medicine designates this live activity for a maximum of 20.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Other health care professionals are awarded 2.0 continuing education units (CEU's) which are equal to 20.7 contact hours.

ASET - The Neurodiagnostic Society has granted 20.5 Continuing Education Units [ASET-CEUs] for this program. Such crediting, however, should not be construed by program participants as an endorsement of any type of instruments or supplies mentioned or involved in these presentations.

**Faculty Disclosure**
All individuals in a position to control the content of this education activity are required to disclose all relevant financial relationships with any proprietary entity producing, marketing, re-selling, or distributing health care goods or services, used on, or consumed by, patients.

**Special Needs**
Participation by all individuals is encouraged. Advance notification of any special needs will help us provide better service. Please notify us of your needs at least two weeks in advance of the program by calling 412-647-1453.

**Cancellation Policy**
- Registration fee is 100% refundable up until September 5, 2017
- A 50% refund of the registration fee will be offered between September 5 and October 5, 2017
- After October 5, 2017 – NO REFUNDS GRANTED

Cancellation requests should be sent to:
Josh Sunderlin, Course Coordinator
Procirca Center for Clinical Neurophysiology
Phone: 412-647-1453  Email: sunderlinj@procirca.com

**Course Location and Hotel Accommodations**

**Location:**

**UPMC Presbyterian Hospital**
Biomedical Science Tower
Room S120
Pittsburgh, PA 15213

**Hotels within walking distance of campus:**

**Hilton Garden Inn Pittsburgh University Place**
454 Forbes Avenue
Pittsburgh, PA 15213  Phone: (412) 683-2040

Distance from campus is 0.3 miles; travel time on foot is five minutes.

A block of rooms is being held at the Hilton Garden Inn University Place at a rate of $139.00/Night.

Wyndham Pittsburgh University Center
100 Lytton Avenue
Pittsburgh (Oakland), PA 15213
Phone: (412) 682-6200

Distance from campus is 0.7 miles; travel time on foot is 10 minutes.

Wyndham nightly parking charge: $10.00

The University of Pittsburgh is an affirmative action, equal opportunity institution.
Course Directors and Faculty:
Partha Thirumala, M.D., Donald Crammond, Ph.D., and Jeffrey Balzer, Ph.D.
